# COMPANY OVERVIEW

## Brecon Energy Limited is a joint venture company established in 2015.

The joint venture brings together **Systems Power Engineering Limited (SPE)** which was established in 1983 for the North Sea oil industry with a range of products and services that support projects and installations at all stages of development, build, service, maintenance and operation, with **ELMECON Ltd**, a specialist switchgear design and development company which was created in 1990 and has provided design and technical assistance to over 50 companies in 30 countries.

SPE bring its wealth of experience in the installation, testing, commissioning and maintenance of switchgear, transformers and protection, while ELMECON brings a wealth of knowledge in switchgear design, development, testing, certification and technologies employed in modern day switchgear manufacture.

Brecon Energy Limited was created to bring technical innovative solutions to the switchgear distribution market.

Product performance and service excellence, which is second to none, is implemented by a Brecon Energy Limited 7S management system in order to drive quality and continuous improvement throughout all stages of design, development, certification, production, delivery, installation and commissioning. Our systems and processes provide complete traceability throughout product build and service delivery.

Brecon Energy Limited constantly strives to ensure that the organisation is a customer focused business and provides unrivalled levels of customer service.

# PRODUCT RANGE

Brecon Energy Limited is proud to present its innovative GENiSYS range of 12kV switchgear along with ARIES-12kV range of ring main equipment.
